TYER LEINSTER G. MERCADO

San Roque, Rosario, Batangas
+63 9078985125
leinster.tyer12@gmail.com

TECHNICAL EXPERIENCE

Practice and knowledge in basic programming/object-oriented programming language:

- **JavaScript, HTML, CSS**: Built an e-commerce website project featuring a bicycle store. https://github.com/tyermercado/bicycleEcommerce
- **React:** Built an e-portfolio. https://tyermercado.github.io/tyermercado-portfolio/
- **XML, XSLT, JS**: Collaboration to debug a Library management system. https://github.com/tyermercado/Library-management-system
- **PHP**: Developed a responsive e-commerce website and hosted it over the web. https://github.com/tyermercado/sneakers-eCommerce
- **MS SQL and MySQL:** Able to execute scripts and have basic knowledge of relational database management systems.
- **VB.net:** Collaborated to debug and developed a POS system, Ordering system, Kitchen Display system, and Queuing system for a capstone project.
- **Java:** Developed a Job Application Tracking System following the MVC (Model-View-Controller) architecture using Spring Boot and MySQL. https://github.com/tyermercado/Job-Application-Tracking-System/tree/main
- **Object-Oriented Programming (OOP):** Experienced in applying OOP principles such as encapsulation, inheritance, polymorphism, and abstraction across various personal projects.
- **Python:** Developed a booking application for the Little Lemon Website using Django and MySQL as the database, incorporating CRUD API functionality. Notably, the "Reserve a Table" feature is fully operational. https://github.com/tyermercado/LittleLemonBookingSystem
- Proficient in **Git.**

SKILLS

- Knowledgeable in Agile methodology
- Able to collaborate and communicate with different teams.
- Adaptable and willing to learn.

EXPERIENCE

Infor PSSC Inc.
Field Ops Business Manager, Associate
April 2024 – Present (Contract)

Responsible for ensuring the accuracy and legitimacy of business data by conducting thorough validations and checks. Works closely with various departments to uphold high standards of data quality. Specific responsibilities include:

- Identifying and merging duplicate accounts following criteria provided by the Data Governance Team.
- Conducting detailed research in D&B Hoovers to verify account information and ensure alignment with the correct D&B record.
- Updating account details in Salesforce and CRM platforms according to official company websites and D&B records.
- Parenting accounts and tagging them with the correct D&B numbers.
- Mass uploading accounts to Salesforce and tagging them as Everclean Certified using the Salesforce Data Loader tool.
